

Impacts, Improvements and Innovations: Community Resiliency

Water and wastewater systems involve complex interactions between human, technological and environmental components. Resilience is the ability of these systems to absorb disturbances and adapt while retaining their core functions. Join us in the discussion of how to foster resilience and innovation in the management of water and wastewater systems in light of climate change.

Confirmed Speakers

Natalia Moudrak

Intact Centre on Climate Adaptation

Tyler Dupp

Eramosa

Dan Sandnik

Institute of Catastrophic Loss Reduction

Elmer Lickers

Ontario First Nations Technical Services Corporation
